

ShipRush for SQL Server

Used By

- ⌘ Web Developers
- ⌘ Ecommerce developers
- ⌘ WMS developers with single-parcel needs

Used To

- ⌘ Easily add shipping to existing web and GUI applications.
- ⌘ Leverage skills of database developers and web masters.
- ⌘ Ship from multiple FedEx accounts, including advanced drop shipping features.

Used Because

- ⌘ Works at the database level. Any DBA or web developer can do the integration.
- ⌘ Development tool and operating system independent. All integration is at the database level and is highly simplified thanks to the advanced templating technology in the core ShipRush system.
- ⌘ Full bidirectional system. Tracking numbers and cost are automatically posted back to the database.
- ⌘ Advanced label printing and label saving options.

Examples

- ⌘ AspDotNetStorefront uses ShipRush Server to put a "print shipping label" button in commercial shopping cart software running on SQL Server.
- ⌘ Delightful Deliveries uses ShipRush Server in their custom MySQL ecommerce engine to print drop-ship type labels on behalf of several clients.
- ⌘ Batdorf & Bronson Coffee Roasters built ShipRush Server into their in house ecommerce system to automate FedEx label printing.

Limitations

- ⌘ Single parcel shipments only
- ⌘ Limited international shipping support

Cost

\$995 per FedEx account or \$3995 for unlimited FedEx account support
