

ShipRush SDK

Developers! Put shipping into your applications in hours, not weeks! The SDK includes visual and non-visual tools for desktop and server applications. Intuit uses ShipRush technology in QuickBooks and so can you!

Features and Benefits:

- ⌘ Put a ship-button in your application
- ⌘ Easy implementation and extensive examples – initial integration is just a few hours away for most sites
- ⌘ Visual and non-visual tools
- ⌘ All shipping information is exposed – persist it your way
- ⌘ Capture tracking numbers, cost and other shipping details
- ⌘ For shipping with the U.S. Postal Service, FedEx and UPS
- ⌘ Extensive sample application library, including .NET, Java, VB6, VC++, Delphi, and more
- ⌘ The SDK can either print the label or return the label image to your code for printing – raster or thermal.
- ⌘ ActiveX and Web Service integration points
- ⌘ Browser Plugin for web applications
